NEWS RELEASE

08-05: March 25, 2008

TSX-V: CLZ
www.canasil.com

**Canasil Options Salamandra and Victoria Projects
in Durango State, Mexico, to Blackcomb Minerals**

Vancouver, March 25, 2008 – Canasil Resources Inc. (“Canasil” [TSX-V: CLZ](http://www.tsx-v.com)) is pleased to announce the signature of a letter agreement with Blackcomb Minerals Inc. (Blackcomb) providing for Blackcomb to earn a 60% interest in Canasil’s Salamandra and Victoria projects for \$7 million exploration expenditures and \$375,000 in cash or share payments over 6 years. As part of the agreement, Blackcomb will have the option to acquire up to 1.5 million shares of Canasil in 3 placements over a period of 2 years. A formal agreement, which is subject to acceptance by the TSX Venture Exchange, will follow.

The Salamandra and Victoria projects cover a large prospective area of over 100,000 hectares, located on a mineral rich trend, stretching from the northwest to the southeast, through Durango and Zacatecas States. There are numerous mines and large silver, gold and base metal deposits located on this trend. Geophysics and diamond drilling completed by Canasil to date has identified significant zinc-silver mineralization at Salamandra, with preliminary metallurgical tests showing high zinc and silver recoveries to clean concentrates. Initial reconnaissance in the Victoria project area has outlined 12 prospective target zones for further evaluation.

Blackcomb is a private Vancouver based mineral exploration company with significant working capital and the same principals, management and technical team as Orko Silver Corp. (Orko). This well established technical and operating team, based in Vancouver and Durango, has extensive operating capabilities and technical knowledge in Durango State. These capabilities will provide significant leverage towards creating value from the planned exploration expenditures on the Salamandra and Victoria projects, which are located immediately to the southeast of Orko’s La Preciosa silver project. Blackcomb plans an active exploration program on these projects, including an airborne geophysical survey of the extensive Victoria claim area, and further ground geophysics and diamond drilling at Salamandra.

Mike Devji, President of Blackcomb, commented: “Blackcomb Minerals Inc. is very pleased to have the opportunity to earn a 60% interest in the Salamandra and Victoria concessions. We regard these properties as highly prospective and feel they have the potential to host large economic deposits.”

Bahman Yamini, President and CEO of Canasil, commented: “We are very excited about the future prospects for the joint venture with Blackcomb. We believe these projects have exceptional potential. The Blackcomb team’s very successful track record at the neighboring La Preciosa project and their financial, technical and operating capabilities provide significant opportunities for an active exploration program to create shareholder value for both companies.”

The Salamandra and Victoria projects are located 30 kilometres to the northeast of the city of Durango in central Mexico. The claim area covers a large strategic land position within an area which has generated a number of important recent discoveries, and benefits from excellent access and infrastructure for mineral exploration and development. The projects are located on the mineral-rich Fresnillo geologic trend, approximately 80 km northwest of the San Martin mine of Grupo Mexico, which is the largest underground zinc-copper-silver mining operation in Mexico, producing at approximately 6,000 tonnes per day.

About Canasil:

Canasil is a Canadian mineral exploration company with interests in precious and base metal properties in Durango, Sinaloa and Zacatecas States, Mexico, and in British Columbia, Canada. The Company's directors and management include industry professionals with a consistent track record of identifying and advancing successful mineral exploration projects. The Company is actively engaged in the exploration of mineral properties and evaluating additional acquisition opportunities.
