CONSOLIDATED FINANCIAL STATEMENTS

FOR THE THREE MONTHS ENDED  
MARCH 31, 2006

(UNAUDITED)

## **NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS**

Under National Instrument 51-102, Part 4, subsection 4.3(3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not be reviewed by an auditor.

The accompanying unaudited interim financial statements of the Company have been prepared by, and are the responsibility of, the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with the standards established by the Canadian Institute of Chartered Accountants for a review of financial statements by an entity's auditor.

**CANASIL RESOURCES INC.**

Notes to the Consolidated Financial Statements

March 31, 2006 and 2005

(Unaudited)

**1. NATURE AND CONTINUANCE OF OPERATIONS**

Canasil Resources Inc. (the "Company") is considered to be in the exploration stage with respect to its interest in resource properties. Based on the information available to date, the Company has not yet determined whether these properties contain economically recoverable ore reserves.

The recovery of the amounts comprising resource properties and deferred exploration costs is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete its exploration and development and upon future profitable production.

These financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future.

	March 31	December 31
	2006	2005
Deficit	\$ (4,238,840)	\$ (4,140,389)
Working capital	\$ 32,576	\$ 224,048

**2. SIGNIFICANT ACCOUNTING POLICIES**

These interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in Canada and follow the same accounting policies and methods as our most recent annual financial statements. Accordingly, these financial statements should be read in conjunction with the Company's 2005 audited consolidated financial statements.

These interim consolidated financial statements include all adjustments that are, in the opinion of management, necessary for fair presentation.

**CANASIL RESOURCES INC.**

Notes to the Consolidated Financial Statements

March 31, 2006 and 2005

(Unaudited)

**3. EQUIPMENT**

	March 31, 2006			December 31 2005
	Cost	Accumulated Amortization	Net Book Value	Net Book Value
Automobile	\$ 27,730	\$ 1,040	\$ 26,690	\$ -
Furniture and equipment	15,871	8,637	7,234	6,692
	\$ 43,601	\$ 9,677	\$ 33,924	\$ 6,692

**4. RESOURCE PROPERTIES****Tres Marias and Cebollas properties, Mexico**

During 2004, the Company entered into an option agreement with Wheaton River Minerals Ltd. ("Wheaton") and its wholly owned subsidiary Minas Luismin S.A. de C.V. to earn a 51% interest in the Tres Marias and Cebollas Gold / Silver properties located in Durango State, Mexico. In 2005 Wheaton merged with Goldcorp Inc.

In accordance with the terms of the agreement, the Company issued 50,000 common shares at a value of \$8,000 and must also incur exploration expenditures of US\$1,000,000 over five years. The Company's interest may be increased to 75% in the sixth year by incurring an additional US\$700,000 in exploration expenditures. Goldcorp Inc. may buy back a 35% interest in the properties for US\$1,700,000 after the Company has acquired a 75% interest. The property is subject to a 3% net smelter returns royalty ("NSR").

**Sandra and Nora project, Mexico**

During 2005, the Company acquired, through staking, claims located in the Sierra Madre Occidental volcanic belt in Durango State, Mexico.

**Los Azules project, Mexico**

During 2005, the company acquired, through staking, claims in Sinaloa State, Mexico, located 60km southeast of the City of Mazatlan.

**San Francisco project, Mexico**

During 2005, the Company acquired through staking, claims located in the Sierra Madre Occidental volcanic belt in Durango State, Mexico.

**CANASIL RESOURCES INC.**

Notes to the Consolidated Financial Statements  
March 31, 2006 and 2005  
(Unaudited)

---

**4. RESOURCE PROPERTIES (continued)****La Esperanza project, Mexico**

During 2005, the Company entered into an option agreement to purchase a 100% interest in the La Esperanza project, subject to a Net Smelter Return royalty of up to 1.5%. The claims are located in Zacatecas State, Mexico. Under the terms of a subsequent definitive agreement, the Company has the right to acquire these claims by making option payments over a period of three years totaling \$174,000 (US\$150,000).

**Colibri project, Mexico**

During 2005, the Company acquired through staking, claims located in Durango State, Mexico. The Colibri District is on the eastern border of Sierra Madre Occidental volcanic province.

**Salamandra project, Mexico**

During the quarter, the Company signed a letter of intent to enter into an option agreement to purchase a 100% interest in the Salamandra project, subject to a NSR of 2%. In accordance with the terms of the agreement, the Company has the right to acquire these claims, which cover 900 hectares, by making option payments over a period of three years totalling \$554,000 (US\$475,000).

The Salamandra project, covering 900 hectares is located 35km northeast of the city of Durango in the Durango State. The Company has acquired an additional 2,000 hectares by staking ground surrounding the existing claims, making the total claim area covered by the project 2,900 hectares.

**Brenda Claims, Canada**

The Company owns twenty-two mineral claims in North Central British Columbia (expiring May 30, 2015).

**Lil Claim, Canada**

The Company owns one mineral claim consisting of 20 units known as the Lil Claim in the Omineca Mining division of British Columbia (expiring April 10, 2010).

**Granite Claims, Canada**

The Company owns one mineral claim in the Omineca Mining division of British Columbia (expiring October 6, 2009).

**Vega Claims, Canada**

The Company owns four mineral claims (expiring June 14, 2006) and eight mineral claims (expiring July 28, 2006) in the Omineca Mining division of British Columbia.

**6. STOCK OPTIONS AND WARRANTS**

The Company has an Incentive Stock Option Plan (the "Plan") which complies with the rules set forth for such plans by the TSX Venture Exchange ("TSX-V") in that at no time may more than 5% of the outstanding issued common shares be reserved for incentive stock options granted to any one individual. The Plan provides for the issuance of options to directors, officers and employees of the Company and its subsidiaries to purchase common shares of the Company. The stock options may be issued at the discretion of the Board of Directors and may be exercisable during a period not exceeding five years. Stock options granted under the Plan will vest in equal quarterly tranches over a period of not less than 18 months. At no time will more than 2,000,000 shares be under option pursuant to the Plan (see note 10(b)). The exercise price will not be lower than, the greater of, "market price" of the shares on the TSX-V at the time of grant or \$0.10 per share.

At March 31, 2006, the Company had outstanding stock options, enabling holders to acquire common shares as follows:

Number of Shares	Exercise Price	Expiry Date
100,000	\$ 0.23	April 17, 2007
650,000	\$ 0.26	November 6, 2008
150,000	\$ 0.10	August 31, 2010
800,000	\$ 0.20	March 6, 2011

**CANASIL RESOURCES INC.**

Notes to the Consolidated Financial Statements

March 31, 2006 and 2005

(Unaudited)

**6. STOCK OPTIONS AND WARRANTS (continued)**

Stock option and share purchase warrant transactions are summarized as follows:

	Warrants		Options	
	Number	Weighted Average Exercise Price	Number	Weighted Average Exercise Price
Balance, December 31, 2004	2,250,000	\$ 0.35	1,050,000	\$ 0.27
Cancelled/expired	(2,250,000)	0.35	(300,000)	0.32
Granted	-		150,000	0.10

Cancelled/expired	-		-	-
Granted	-		800,000	0.20
Balance, March 31, 2006	-		1,700,000	\$ 0.22
Exercisable, December 31, 2005	-	\$ -	787,500	\$ 0.26
Exercisable, March 31, 2006	-	\$ -	1,025,000	\$ 0.23

**Stock-based compensation**

During the three months ended March 31, 2006, the Company granted incentive stock options to directors, officers and consultants of the company to acquire up to 800,000 common shares with a weighted fair value of \$0.10 per share. One quarter of these options (200,000) vested during the current period resulting in stock-based compensation expense under the Black-Scholes option pricing model of \$19,483 being recognized. During the 2005 fiscal year, the Company granted 150,000 stock options. One-quarter of these options (37,500) vested in prior years and one-quarter (37,500) vested during the first three months of current year resulting in stock-based compensation expense under the Black-Scholes option pricing model of \$1,191 (March 31, 2005 - \$ Nil) being recognized.

**CANASIL RESOURCES INC.**

Notes to the Consolidated Financial Statements

March 31, 2006 and 2005

(Unaudited)

**6. STOCK OPTIONS AND WARRANTS (continued)****Stock-based compensation (continued)**

The following weighted average assumptions were used for the Black-Scholes valuation of stock options issued during the period:

	March 31, 2006
Risk-free interest rate	4.07%
Expected life of options	2 years
Annualized volatility	97%
Dividend rate	0.00%

**7. RELATED PARTY TRANSACTIONS**

The Company entered into the following transactions with related parties:

- a) Paid or accrued \$12,000 (March 31, 2005 - \$12,000) for management fees to a company controlled by a director.
- b) Paid or accrued \$1,206 (March 31, 2005 - \$3,286) for legal services to a law firm in which an officer of the Company is a partner.
- c) Paid or accrued \$4,500 (March 31, 2005 - \$4,500) to a director and to two companies each controlled by a director.
- d) Paid or accrued \$4,912 (March 31, 2005 - \$3,650) to a company controlled by an officer of the Company for accounting and management fees.

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Included in accounts payable at March 31, 2006 is \$30,631 (December 31, 2005 - \$2,334) due to directors and officers or to companies controlled by directors and officers and to a law firm in which an officer of the Company is a partner.

**9. SEGMENTED INFORMATION**

The Company's one reportable operating segment is the acquisition and exploration of resources properties. Geographic information is as follows:

The Company's assets are located in the following geographic locations:

	March 31 2006	December 31 2005
Canada	\$ 1,442,478	\$ 1,521,328
Mexico	653,071	594,329
	\$ 2,095,549	\$ 2,115,657

**10. SUBSEQUENT EVENTS**

- a) Subsequent to the end of the period, the Company announced that it had negotiated a non-brokered private placement of up to 3,000,000 units at a price of \$0.25 per unit for total proceeds of up to \$750,000. Each unit will consist of one common share of the Company and one share purchase warrant. Each Warrant will entitle the holder to purchase one common share of the Company at a price of \$0.35 within one year from closing of the private placement.
- b) At the Annual General Meeting of the Company held on May 17, 2006, the shareholders approved an amendment to the Company's stock option plan to change the number of shares allocated and reserved for use in the existing plan from two million shares to 10% of the Company's issued common shares from time to time.

**CANASIL RESOURCES INC.**  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
For the Quarter ended March 31, 2006

---

This Management's Discussion and Analysis ("MD&A") for Canasil Resources Inc. ("the Company") is dated May 30, 2006 and provides information on the Company's activities for the quarter ended March 31, 2006 and to the date of this report. The following discussion and analysis of the financial position of the Company should be read in conjunction with the audited financial statements and related notes, as well as with the MD&A for the year ended December 31, 2005.

### **Business of the Company**

The Company was incorporated in 1984 and is engaged in the exploration and development of mineral properties hosting copper-gold, gold, silver, zinc and lead prospects located in Durango, Sinaloa and Zacatecas States, Mexico, and in British Columbia, Canada. During the first quarter of 2006, the company has implemented the planned exploration programs on its mineral properties in Mexico, and continued with plans for the 2006 exploration programs on its mineral properties in British Columbia, Canada, for the 2006 field season. The Company has also acquired an additional zinc-silver exploration property in Mexico, exhibited at a number of industry conferences, and announced a private placement to fund continued exploration work and to strengthen the Company's working capital.

### **Overall Performance**

The Company's focus in Mexico during the quarter was to actively implement geologic mapping and sampling on the Sandra, and Colibri exploration properties in order to define targets for drilling. The Company has also continued the evaluation and acquisition of new exploration projects with potential for silver, gold, zinc and copper deposits in Mexico. This program resulted in an option agreement to acquire 100% interest in the Salamandra zinc-silver project in Durango State. During the quarter, expenditures on the Company's Mexican projects were \$82,451 (1<sup>st</sup> quarter 2005 - \$ 52,108) and general exploration expenditures for project evaluation and acquisition were \$8,631 (1<sup>st</sup> quarter 2005 - \$41,702).

Trench sampling at the Sandra project has identified at least three significant drill targets on structures hosting silver, gold, zinc and lead. Geologic mapping and channel sampling at the Colibri project has identified a potentially large structure returning significant silver, zinc, lead and copper values. The Salamandra project covers 900 hectares, which has been increased to 2,900 hectares through the acquisition of an additional 2,000 hectares through staking of surrounding claims. The Company is continuing the channel sampling program at the Colibri project and plans to undertake geologic mapping and sampling programs at the Los Azules copper-gold and Salamandra zinc-silver projects during the second quarter of 2006. The Company is also investigating opportunities to start drill programs at the Sandra and La Esperanza projects in Mexico.

In British Columbia, Canada, the Company continued to complete the compilation and analysis of the Brenda gold-copper project data, which has indicated several large untested target zones for further drilling. The Company has prepared a drill program for the Brenda project for up to 3,000 metres of drilling in 10 drill sites, and filed requests for drill permits for the 2006 field season. The Company has also held discussions with major companies interested in possible joint ventures on the Brenda project and signed a confidentiality agreement with one prospective partner. Continued discussions are subject to a project visit planned for early June 2006. The Company will evaluate whether to proceed with a joint venture or directly with the planned exploration program depending on the terms of any joint venture proposals received.

The Company has also made progress with data compilation and mapping for the Vega copper-gold project in B.C., Canada, and maintained the other mineral claims in British Columbia in good standing. Total expenditures on the British Columbia properties during the quarter were \$ 4,012 (1<sup>st</sup> quarter 2005 - \$11,304).

In March 2006, Dr. Andre Panteleyev and Mr. Arthur Freeze agreed to join the Company as advisors to the Board of Directors. Both Dr. Panteleyev and Mr. Freeze are recognized figures in the mineral exploration industry and their contributions will have a significant impact on the Company's future exploration and development programs.

The Company exhibited at the Vancouver Resource Investment Conference and Vancouver Mineral Exploration Roundup in January 2005, at the Prospectors and Developers Association of Canada conference in March 2006, and at the Calgary Resource Investment conference in April 2006. The Company will be exhibiting at the Vancouver World Gold, PGM and Diamond Investment conference in June 2006. Investor relations expenditures during the quarter were \$ 22,133 (1<sup>st</sup> quarter 2005 - \$ 15,524).

On April 20, 2006, the Company announced a non-brokered private placement of 2,500,000 units at \$0.25 per unit to fund its continued exploration activities and for working capital. The placement was subsequently increased to 3,000,000 units, which were fully subscribed as of the date of this report.

**Financial Condition, Results of Operations and Cash Flows**

The Company's working capital as at March 31, 2006, was \$ 32,576 (2005 - \$ 224,048). The Company has sufficient working capital to meet current operating requirements and planned expenditures for exploration and maintenance of its mineral property interests for the first half of 2006. The Company has announced and undertaken additional financing as noted above for ongoing exploration programs and for working capital. Operating expenditures during the quarter were \$ 99,210 (1<sup>st</sup> quarter 2005 - \$108,537) and the Company earned interest income of \$ 759 (1<sup>st</sup> quarter 2005 - \$ 3,706). The operating expenditures included stock-based compensation of \$ 20,674 (1<sup>st</sup> quarter 2005 – Nil) for 237,500 stock options that vested during the quarter. Net cash used for operating activities decreased to \$ 21,142 (1<sup>st</sup> quarter 2005 - \$98,529). This was primarily due to stock based compensation of \$20,674, which is a non-cash entry, and a decrease in accounts receivable of 25,944 (1<sup>st</sup> quarter 2005 increase of \$ 20,324). Cash used for deferred exploration expenditures and acquisition costs on resource properties during the quarter was \$ 62,000 (1<sup>st</sup> quarter 2005 – \$ 63,415), and for equipment purchases of \$ 28,629 (1<sup>st</sup> quarter 2005 - \$ 1,782). There was no cash flow from financing activities during the quarter in 2006 or 2005.

**Mineral Properties**

The Company acquired the following mineral exploration projects in Mexico during 2005 and to the date of this report:

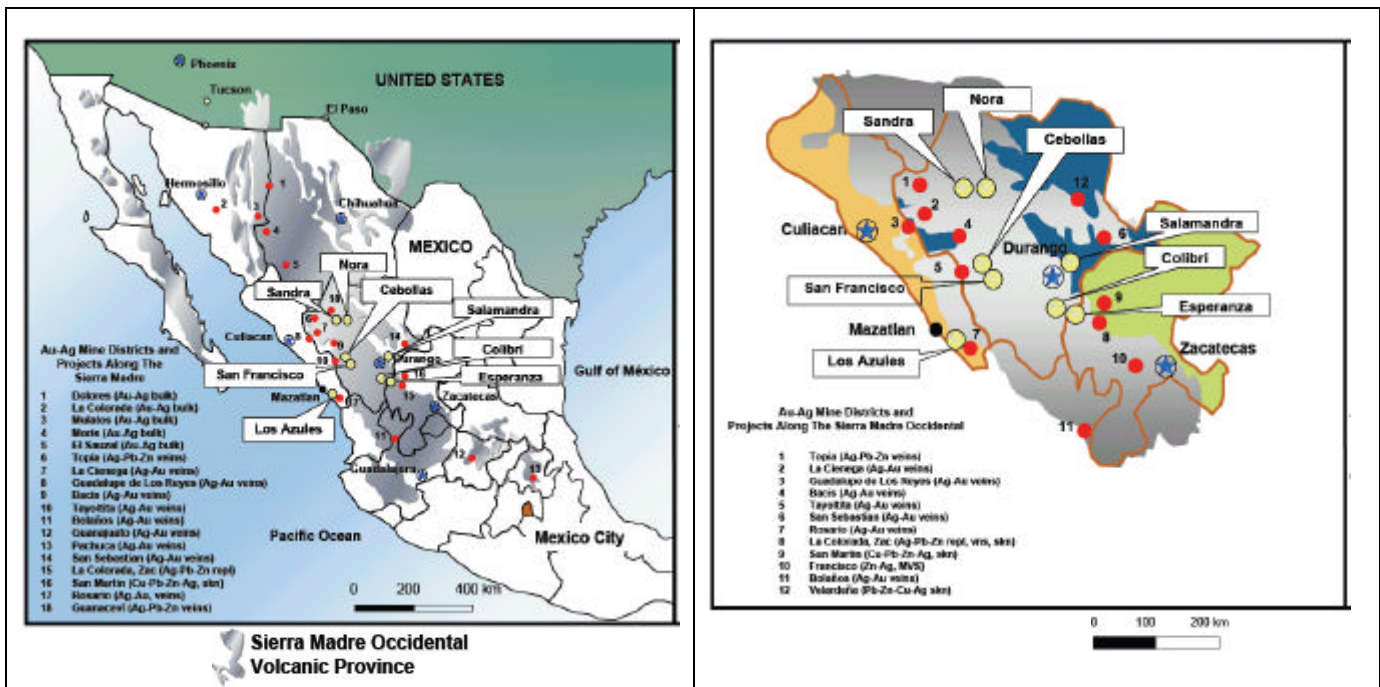

- Sandra and Nora gold-silver project – 100%
- San Francisco gold-silver project – 100%
- Los Azules copper gold project – 100%
- La Esperanza silver zinc lead project – option to earn 100%
- Colibri silver zinc lead copper project – 100%
- Salamandra zinc silver project (March 2006) – option to earn 100%

Under option and joint venture agreements signed in 2003 with Goldcorp and Luismin, the Company holds an option to earn up to a 75% interest in the Tres Marias and Cebollas silver-gold properties in the San Dimas District, Durango State, Mexico.

The Company holds 100% interest in the following mineral properties located in the Omineca Mining District, in North-central British Columbia, Canada:

- Brenda, gold-copper property
- Vega, gold-copper property
- Granite, gold property
- LIL, silver property

**Exploration projects in Mexico**

### **Tres Marias and Cebollas silver-gold properties, Durango State, Mexico**

The Tres Marias and Cebollas properties, covering 3,163 hectares, are located 150 km west of the city of Durango and 14 km southeast of Luismin's San Dimas/Tayoltita mine. The Company has an option agreement with Goldcorp Inc. and Luismin to earn up to a 75% interest in these properties by issuing 50,000 shares and incurring US\$1,700,000 in exploration expenditures over five years. Goldcorp/Luismin retains an option to buy back a 35% interest in the properties for US\$1,700,000 after Canasil has acquired a 75% interest. There was no additional exploration work on these projects during the quarter. Canasil has fulfilled its obligations under the agreements to October 2006.

#### *Sandra and Nora silver-gold project, Durango State, Mexico*

The Sandra project covers 1,200 hectares, located 183 km northeast of the city of Durango in Durango State, Mexico, and benefits from excellent infrastructure and access. The Company has 100% title to the Sandra claims, which were acquired by staking and are located immediately south of a large claim group controlled by Pan American Silver Corp. The initial surface sampling and geological mapping program during the third quarter 2005 identified a number of mineralized veins over an area of approximately 2,000 x 750 metres in the central area of the Sandra claims. Rock and chip samples from these veins returned encouraging grades of up to 9.74 g/t gold, 635 g/t silver, 2.46% copper and 20.06% lead as announced on November 2, 2005.

Trench sampling during the first quarter of 2006 confirmed silver and gold mineralization observed in earlier surface samples from the Barite, Maria Fernanda, and Encino veins. Assay results returned silver grades of up to 888 g/t (25.9 oz/t) silver over 0.7 metres at the Barite vein, and up to 9.95 g/t (0.29 oz/t) gold and 365 g/t (10.65 oz/t) silver over 0.5 metres at the Maria Fernanda vein, where trench samples indicate consistent silver/gold mineralization over a strike length of approximately 300 metres. These results now confirm and define targets for drilling at the Sandra project in order to explore extensions of these veins along strike and at depth. The silver and gold grades observed in samples taken across the entire width of the mineralized structures are encouraging because they confirm the high grades seen in the earlier surface sampling program. A diamond drill program is now warranted to test these vein systems at depth. Expenditures on the Sandra and Nora project during the quarter were \$44,514 (1<sup>st</sup> quarter 2005 - \$ 726).

#### *La Esperanza silver-zinc-lead project, Zacatecas State, Mexico*

During the year, the Company has an option agreement to purchase a 100% interest in the La Esperanza project, subject to a Net Smelter Return royalty of up to 1.5%. Under the terms of the agreement, the Company has the right to acquire these claims by making option payments over a period of three years totalling \$174,000 (U.S.\$150,000). The La Esperanza project, covering 335 hectares, is located in the state of Zacatecas, 100 km south-southeast of the city of Durango. The project area is easily accessible from the Company's operating base in Durango and is well served with power lines, water access and services for supporting exploration and mining operations.

Results from geologic mapping and surface sampling program carried out in 2005 and first quarter of 2006 have defined drill targets. A diamond drill program is now warranted to test for mineralized structures below the old mine workings. Expenditures on the La Esperanza project during the quarter were \$12,793 (1<sup>st</sup> quarter 2005 - \$ Nil).

#### *Colibri gold-silver-zinc-copper-lead project, Durango State, Mexico*

The Company acquired the Colibri claims, covering a total of 6,413 hectares, through direct staking of the claim blocks, giving the Company 100% title. There are a number of mineralized structures in the project area carrying silver, zinc and lead as well as gold and copper. The project site is located 70 km southeast of the city of Durango with a travel time of approximately 1.5 hours. The infrastructure at the property is excellent with access to power, water and all required services.

The Company started a geologic mapping and surface sampling program in March 2006. Initial results have outlined a broad, banded, mineralized structure with a strike length of over 400 metres and widths up to 30 – 50 metres. Specific zones within this structure returned high silver, zinc, copper and lead values. The sampling program is continuing and will lead to definition of drill targets for further exploration. Expenditures on the Colibri claims during the quarter were \$15,670 (1<sup>st</sup> quarter 2005 – \$ Nil).

#### *Los Azules gold-silver-copper project, Sinaloa State, Mexico*

The Company acquired a 100% interest in the Los Azules claims in Sinaloa State, Mexico, covering 7,844 hectares, by direct staking between May and August 2005. The claims host prospects for epithermal low sulphidation vein type mineralization carrying gold, silver and copper. The Los Azules property is located 60 km southeast of the city of Mazatlan. The infrastructure at the property is excellent with the new Mazatlan-Escuinapa highway providing direct and easy access to the City and port facilities of Mazatlan. Power and water are available throughout the district. There was no significant exploration work on the project during the first quarter and expenditures were \$ 858 (1<sup>st</sup> quarter 2005 - \$ 6,623).

*Salamandra zinc-silver project, Durango State, Mexico*

In March 2006, the Company signed a letter of intent to enter into an option agreement to purchase a 100% interest in the Salamandra project, subject to a Net Smelter Return royalty of 2%. Under the terms of the proposed agreement, the Company has the right to acquire these claims by making option payments over a period of three years totalling \$554,000 (U.S.\$475,000). The Salamandra silver-zinc project, covering 900 hectares in Durango State, is located 35 km northeast of the city of Durango, with good access via paved and gravel roads. The Company has acquired a further 2,000 hectares by staking ground surrounding the existing claims, making the total claim area covered by the project 2,900 hectares. The access, infrastructure, climate and topography at Salamandra provide favourable conditions for exploration and development.

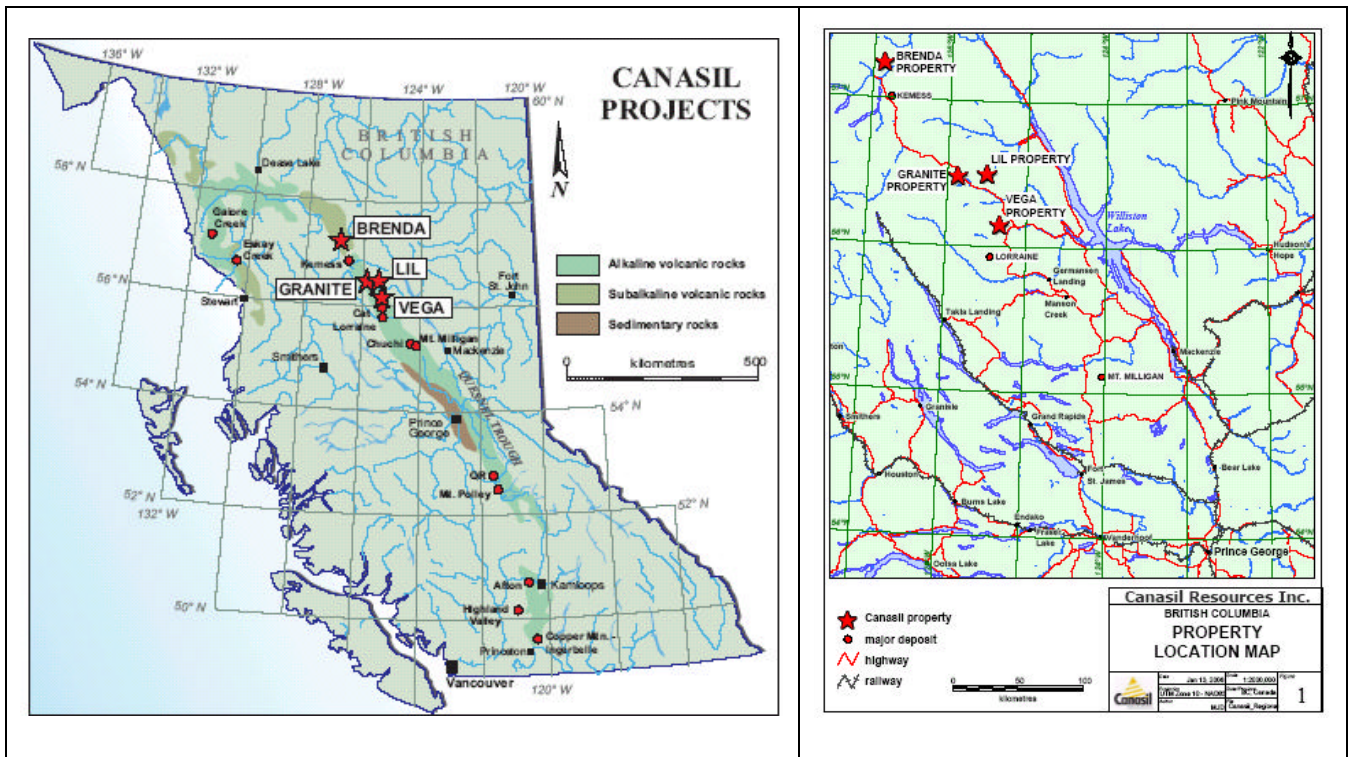

Expenditures on the Salamandra project during the quarter were \$7,981 (1<sup>st</sup> quarter 2005 – \$ Nil).

*San Francisco gold-silver project, Durango, Mexico*

The San Francisco property, covering 500 hectares, is located approximately 104 km West of the city of Durango, and approximately 12 km south of the Company's Tres Marias and Cebollas silver-gold projects, located 14 km southeast of the Tayoltita mine in the San Dimas mining district of Durango. The claims are within view of the community of San Francisco. The access road cuts through the centre of the property, as does the main power line supplying the Tayoltita mine.

There was no exploration work on the San Francisco project during the quarter, and expenditures were \$635 (1<sup>st</sup> quarter 2005 - \$ 1,920)

**Exploration projects in British Columbia, Canada**

**CANASIL RESOURCES INC.**  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
For the Quarter ended March 31, 2006

---

*Brenda gold-copper property, British Columbia, Canada*

The Company holds 100% interest in the Brenda property which consists of 178 claim units, covering 4,450 hectares (44.5 square kilometres). The project is located in the core of the Kemess-Toodoggone porphyry copper-gold district in the Omineca Mining Division, approximately 450 km northwest of Prince George, B.C. All claims are currently in good standing to May 30, 2015.

The Brenda property is an advanced gold-copper exploration project located centrally in the highly prospective Kemess-Toodoggone district. There has been over \$3,000,000 in cumulative exploration expenditures on the property, covering geologic mapping, geochemistry, ground and aerial geophysics, satellite imaging and over 8,000 metres of drilling in 58 drill holes. Compilation and review of the data has indicated several large untested target zones for further drilling.

During the quarter, the Company continued the data compilation work to define drill targets. The Company has applied for a work permit for the 2006 field season covering up to 3,000 metres of diamond drilling in 10 drill holes. The Company has also planned a geologic mapping program at the Brenda project, which is scheduled to start during the fourth week of June 2006. Total expenditures on the Brenda project during the quarter were \$1,204 (1<sup>st</sup> quarter 2005 - \$ 11,304).

The Company has received interest from major companies for a potential joint venture to advance exploration on the Brenda project. The proposed drill program will be carried out either through a joint venture agreement with a partner with strong technical and financial capabilities, or directly by the Company depending upon plans for funding the 2006 exploration programs.

*Vega gold/copper property, British Columbia, Canada*

The 100% owned Vega claims are located in the Omineca Mining Division of British Columbia, 300 km northwest of Prince George. Access to the property is via the Omineca Mines Access Road and logging roads. The claim area was increased by staking in August, 2005 to cover 5,154 Hectares. The Company is carrying out a data compilation program to determine further exploration work covering geologic mapping, sampling and geophysics to define drill targets. Expenditures on the Vega project during the quarter were \$2,808 (1<sup>st</sup> quarter 2005 - \$ Nil).

*LIL property, British Columbia, Canada*

The 100% owned LIL claims, covering 873 hectares, are located in the Omineca Mining Division, 350 km northwest of Prince George, British Columbia. Logging roads provide four-wheel drive access to within 2 km of the property. Mineralization on the property consists of narrow high-grade, silver bearing quartz veins and breccia zones, which have been identified over a distance of 300 metres, with grades ranging from 4.3 ounces/ton to 325.54 ounces/ton silver over 0.20 to 0.90 meters. Large silver bearing floats, found downstream in LIL Creek, indicate a possibility of wider mineralized veins on the property.

There was no active exploration work on the Lil project during the quarter.

*Granite property, British Columbia, Canada*

The 100% owned Granite gold-silver claim, covering 500 hectares in the Johansson Lake area, Omineca Mining Division of British Columbia, is located 360 km northwest of Prince George. The Omineca Resource Access Road and auxiliary roads provide four-wheel drive access to the property.

Historical exploration records reported encouraging gold assays from trenches and sampling in the old underground workings. Three mineralized shear zones with gold/silver mineralization have been identified to date on the property. and outlined a broad 300 metres by 2.0 kilometres gold soil anomaly. Small diamond drill programs by Hemlo Gold Mines Inc in 1995, and the Company in 1997, intersected several sections with anomalous gold and silver values, however failed to locate sections corresponding in grade to the many samples recovered from these zones. There was no active exploration on the Granite property during the quarter. The project is being reviewed to determine future exploration potential.

**CANASIL RESOURCES INC.**  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
For the Quarter ended March 31, 2006

---

During the quarter, the Company incurred general exploration expenditures of \$8,631 compared with \$41,702 for the same period in 2005. In addition, the Company incurred deferred exploration expenditures of \$62,000 compared to \$63,415 in the same period in 2005. Stock-based compensation recorded during the quarter was \$20,674 (1<sup>st</sup> quarter 2005 – \$ Nil).

### **Liquidity and Capital Resources**

The Company has sufficient financial resources to undertake currently planned exploration programs and expenditures. In April 2006, the Company announced that it had negotiated a non-brokered private placement of 2,500,000 units at a price of \$0.25 per unit for total proceeds of \$625,000. Each unit will consist of one common share of the Company and one share purchase warrant. Each warrant will entitle the holder to purchase one common share of the Company at a price of \$0.35 within one year from closing of the private placement. The placement has been over-subscribed and subsequently increased to 3,000,000 units for total proceeds of \$750,000.

Future exploration and subsequent development of the Company's properties beyond planned expenditures will depend on the Company's ability to obtain additional financing. The Company has limited financial resources and there is no assurance that additional funding will be available to allow the Company to fulfil its obligations on existing exploration (or joint venture) properties. Failure to obtain financing could result in the delay or indefinite postponement of further exploration and the possible partial or total loss of interest in certain properties.

The Company is dependent on raising funds by the issuance of shares or disposing of interests in its mineral properties (by options, joint ventures or outright sale) in order to finance further acquisitions, undertake exploration and development of mineral properties and meet general and administrative expenses in the immediate and long term. There can be no assurance that the Company will be successful in securing the required financing.

The Company had working capital at March 31, 2006 of \$32,576 (at Dec. 31, 2005 – \$224,048). The Company had no material income from operations.

As at March 31, 2006, the Company had no long-term debt.

For the quarter ended March 31, 2006, the Company experienced negative cash flow of \$111,771 (march 31, 2005 – \$163,726) from operating, investing and financing activities. This was comprised of cash used in operating activities of \$21,142 (March 31, 2005 - \$98,529) and net cash used in investing activities of \$90,629 (March 31, 2005 - \$65,197).

In March 2006, 800,000 incentive stock options were granted to directors, officers and consultants of the Company, enabling the holders to acquire 800,000 common share of the Company at a price of \$0.20 per share were issued during the quarter.

### **Other Information and Disclosures**

#### ***Related Party Transactions***

During the quarter ended March 31, 2005 the Company paid or accrued a total of \$22,618 (1<sup>st</sup> quarter 2005 - \$23,436) to related parties covering Directors' and management fees and geological and legal services.

#### ***Off-Balance Sheet Arrangements***

The Company does not have any off-balance sheet arrangements and does not contemplate such arrangements in the foreseeable future. There are no contingent liabilities.

#### ***Critical Accounting Estimates***

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, the disclosure of commitments and contingencies at the date of the financial statements, and the reported amount of revenue and expenses during the period. The most significant accounting estimates for the Company relate to the carrying value of its mineral property assets and accounting for stock-based compensation. The Company's accounting policies are set out in full in note 2 to the consolidated audited financial statements.

**CANASIL RESOURCES INC.**  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
For the Quarter ended March 31, 2006

---

*Mineral Property Costs*

The Company is in the exploration stage and defers all expenditures related to its mineral properties until such time as the properties are put into commercial production, sold or abandoned. Under this method, all amounts shown as mineral properties represent costs incurred to date less amounts amortized and/or written off and do not necessarily represent present or future values.

If the properties are put into commercial production, the expenditures will be depleted based upon the proven reserves available. If the properties are sold or abandoned, the expenditures will be charged to operations. The Company does not accrue the estimated future costs of maintaining in good standing its mineral properties.

In the event that reserves are determined, the carrying values of mineral interests, on a property-by-property basis, will be reviewed by management at least annually to determine if they have become impaired. If impairment is deemed to exist, the mineral property will be written down to its net recoverable value. The ultimate recoverability of the amounts capitalized for the mineral properties is dependent upon the delineation of economically recoverable ore reserves, the Company's ability to obtain the necessary financing to complete their development and realize profitable production or proceeds from the disposition thereof. Management's estimates of recoverability of the Company's investment in various projects have been based on current conditions. However, it is reasonably possible that changes could occur in the near term which could adversely affect management's estimates and may result in future write-downs of capitalized property carrying values.

From time to time, the Company may acquire or dispose of properties pursuant to the terms of option agreements. Due to the fact that options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as mineral property costs or recoveries when the payments are made or received.

*Stock-based Compensation*

The fair value of stock options is determined by the Black-Scholes option pricing model, which require the input of highly subjective assumptions, including the expected price volatility of the Company's common shares and the expected life of the options. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore, the model does not necessarily provide a reliable single measure of the fair value of the Company's stock options granted/vested during the year.

***New Accounting Pronouncements***

*Variable Interest Entities*

The CICA has issued Accounting Guideline 15, "Consolidation of Variable Interest Entities", which became effective for annual and interim periods beginning on or after November 1, 2004. This guideline addresses the application of consolidation principles to entities that are subject to control on a basis other than ownership of voting interests. The Company adopted the guideline on January 1, 2005. The adoption of this guideline did not have any impact on the Company's consolidated financial statements.

***Financial Instruments***

The Company's financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities. It is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from its cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities. The fair value of these financial instruments approximates their carrying value due to their short-term maturity.

***Outstanding Share Data as at May 30, 2006***

- (a) Authorized and issued shares as at May 30, 2006 are as follows:

<u>Class</u>	<u>Par Value</u>	<u>Authorized</u>	<u>Issued</u>	<u>Amount</u>
Common	Without par value	100,000,000	18,432,342	\$5,762,048

**CANASIL RESOURCES INC.**  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
For the Quarter ended March 31, 2006

- (b) As at May 30, 2006, a total of 1,700,000 incentive stock options were outstanding of which 1,025,000 incentive stock options were exercisable.

Number of Shares	Exercise Price	Expiry Date
100,000	0.23	April 17, 2007
650,000	0.26	November 6, 2008
150,000	0.10	August 31, 2010
800,000	0.20	March 15, 2011
1,700,000		

- (c) No shares are subject to escrow or pooling arrangements.

***Investor Relations***

The Company maintains a website, [www.canasil.com](http://www.canasil.com), with detailed corporate information and information covering its mineral exploration projects and operations. The Company exhibited at the Vancouver Resource Investment Conference and the Vancouver Exploration Roundup in January 2006. The Company exhibited at the Prospectors and Developers Association of Canada conference in Toronto in March 2006. During the quarter investor relations expenditures were \$15,294 (1<sup>st</sup> quarter 2005 - \$15,524).

***Recent Developments***

Subsequent to March 31, 2006, the Company announced that it had negotiated a non-brokered private placement of 2,500,000 units at a price of \$0.25 per unit for total proceeds of \$625,000. Each unit will consist of one common share of the Company and one share purchase warrant. Each warrant will entitle the holder to purchase one common share of the Company at a price of \$0.35 within one year from closing of the private placement. The placement has been over-subscribed and subsequently increased to 3,000,000 units for total proceeds of \$750,000.

The Company exhibited at the Calgary Resource Investment Conference in April 2006 .

***General Conditions Affecting the Company's Operations***

***General Trends***

The principal business of the Company is the acquisition, exploration and, if warranted, development of natural resource properties of merit. The Company is not geographically limited to any particular region but in recent years has focused attention on natural resource properties in Canada and Mexico.

There has been a trend towards improving base and precious metal prices over the past year, particularly for gold, silver and copper. This trend is forecasted to continue over the coming year. The mining and minerals industry is experiencing increased demand for minerals and metals, in particular from economic growth in Asia. This has resulted in greater interest from the financial community in financing mineral exploration and development projects

***Competitive Conditions***

Significant competition exists for natural resource acquisition opportunities. As a result the Company may be unable to acquire rights to exploit additional attractive mining properties on terms it considers acceptable

***Environmental Protection***

Environmental legislation is evolving in a manner such that standards, enforcement, fines and penalties for non-compliance are becoming stricter. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in government regulations has the potential to reduce the profitability of future operations. To the Company's knowledge, it is in compliance with all environmental laws and regulations affecting its operations.

**CANASIL RESOURCES INC.**  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
For the Quarter ended March 31, 2006

---

*Number of Employees*

As of March 31, 2006, the Company had no employees. All administrative and certain geological services are provided to the Company by consultants or companies controlled by related parties.

*Acquisition and Disposition of Resource Properties*

During the year ended December 31, 2003, the Company entered into option and joint venture agreements to acquire up to a 75% interest in the Tres Marias and Cebollas silver-gold properties in Durango, Mexico, as detailed above. During 2004 the area covered by these properties was increased to 3,163 hectares through option agreements to acquire neighbouring claims and through staking of additional claim blocks.

**Risk Factors Relating to the Company's Business**

The Company's ability to generate revenue and profit from its natural resource properties, or any other resource property it may acquire, is dependent upon a number of factors, including, without limitation, the following:

*Precious and Base Metal Price Fluctuations*

The Company's ability to finance its mineral property acquisition, exploration and eventual development is dependent upon the market price of certain precious and base metals. The price of such metals has fluctuated widely and is affected by numerous economic and political factors, consumption patterns, speculative activities, levels of supply and demand, increased production due to new mine developments and productivity, metal substitutes and stock levels. These fluctuations may result in the Company not receiving an adequate return on invested capital or the investment retaining its value.

*Operating Hazards and Risks*

Mining operations generally involve a high degree of risk, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. Operations in which the Company has a direct or indirect interest will be subject to all the hazards, risks and liabilities normally incidental to exploration, development and production of precious and base metals. The Company presently carries no liability insurance, and any liabilities arising from its operations may have a material, adverse effect on the Company's financial position.

*Exploration and Development*

There is no known body of commercial ore on the Company's mineral properties. Development of the Company's properties will only follow upon obtaining satisfactory exploration results. Mineral exploration and development involves a high degree of risk and few exploration properties are ultimately developed into producing mines. There is no assurance that the Company's mineral exploration and development activities will result in any commercially viable discoveries.

Substantial expenditures are required to establish reserves through drilling, to develop metallurgical processes and the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that the funds required for development can be obtained on a timely basis.

The marketability of any minerals acquired or discovered may be affected by numerous factors which are beyond the Company's control and which cannot be accurately predicted, such as market fluctuations, the proximity and capacity of milling facilities, mineral markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting minerals and environmental protection.

*Calculation of Reserves and Mineralization and Precious and Base Metal Recovery*

There is a degree of uncertainty attributable to the calculation of reserves and mineralization and corresponding grades being mined or dedicated to future production. In addition, there can be no assurance that precious or other metal recoveries in small-scale laboratory tests will be duplicated in larger scale tests under on-site conditions or during production.

**CANASIL RESOURCES INC.**  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
For the Quarter ended March 31, 2006

---

*Government Regulation*

Operations, development and exploration on the Company's properties are affected to varying degrees by government regulations relating to such matters as environmental protection, health, safety and labour; mining law reform; restrictions on production; price controls; tax increases; maintenance of claims; tenure; and expropriation of property. There is no assurance that future changes in such regulation, if any, will not adversely affect the Company's operations.

*Environmental Factors*

All phases of the Company's operations are subject to environmental regulation in the various jurisdictions in which it operates. Environmental legislation is evolving and requires stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation will not adversely affect the Company's operations. Environmental hazards may exist on the Company's properties, which are unknown to the Company at present and which have been caused by previous or existing owners or operators of the properties.

*Title to Assets*

Although the Company has or will receive title opinions for any properties in which it has a material interest, there is no guarantee that title to such properties will not be challenged or impugned. The Company has not conducted surveys of the claims in which it holds direct or indirect interests and therefore, the precise area and location of such claims may be in doubt. The Company's claims may be subject to prior unregistered agreements or transfers or native land claims and title may be affected by undetected defects.

*Foreign Operations*

The Company operates in Mexico and has acquired four mineral properties, through staking, and has option agreements to acquire interests in two other mineral properties. The Company is currently engaged in exploration activities on these properties.

*Management and Directors*

The Company is dependent on a small number of directors and officers: Alvin Jackson, Michael McInnis, Gary Nordin, Bahman Yamini, Iain MacPhail and Graham Scott. The loss of any of these persons could have an adverse effect on the Company. The Company does not maintain key person insurance on any of its management.

*Conflicts of Interest*

Certain officers and directors of the Company are officers and/or directors of other natural resource companies that acquire interest in mineral properties. Such associations may give rise to conflicts of interest from time to time. The directors are required by law to act honestly and in good faith with a view to the best interests of the Company and its shareholders. They are also required to disclose any personal interest in any material transaction, which is proposed to be entered into with the Company, and to abstain from voting as a director for the approval of any such transaction.

*Limited Operating History - Losses*

The Company has experienced losses in all years of its operations. There can be no assurance that the Company will operate profitably in the future. As of March 31, 2006, the Company's accumulated deficit was \$4,238,840.

*Price Fluctuations and Share Price Volatility*

In recent years the securities markets in the United States and Canada have experienced a high level of price and volume volatility. The market price of securities of many mineral exploration companies have experienced wide fluctuations in price, which has not necessarily been related to their operating performance, underlying asset value or prospects. During the twelve months ended March 31, 2006, the price of the Company's shares fluctuated from a low of \$0.06 to a high of \$0.26 per share. There can be no assurance that continued fluctuations in price will not occur.

**CANASIL RESOURCES INC.**  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
For the Quarter ended March 31, 2006

---

*Shares Reserved for Future Issuance - Dilution*

As at March 31, 2006, a total of 18,432,342 common shares of the Company were issued and outstanding. There were 1,700,000 stock options outstanding pursuant to which additional common shares may be issued in the future, which would result in further dilution to the Company's shareholders and pose a dilutive risk to potential shareholders.

***Forward-Looking Statements***

Any statements in this discussion, other than statements of historical facts, that address future production, reserve potential, exploration activities and events or developments that the Company expects, are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance. Actual results and developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, exploration results, availability of capital and financing, and general economic, market and business conditions.

***Corporate Disclosures***

The Company maintains a system of internal controls to provide reasonable assurance that assets are safeguarded and financial information is accurate and reliable. The Board of Directors has responsibility for developing and implementing the Company's approach to governance issues. Committees of the Board presently consist of an Audit Committee and a Management Compensation Committee. The Audit Committee consists of two unrelated, outside directors and one related director. The role of the audit committee is to oversee the Company's financial reporting obligations, systems and disclosure and to act as a liaison between the Board and the Company's auditors. The Board has also appointed a Management Compensation Committee that consists of three unrelated outside directors. The role of the Management Compensation Committee is to determine the remuneration of executive officers and to administer the Company's Stock Option Plan.

**Approval**

The Board of Directors of the Company has approved the disclosure contained in this annual MD&A.

A copy of this MD&A and previously published financial statements and MD&A, as well as other information is available on the SEDAR website at [www.sedar.com](http://www.sedar.com), and on the Company's website at [www.canasil.com](http://www.canasil.com)
